EDUCATION

Kamla Nehru Institute of Technology Sultanpur, India

Bachelor of Engineering, [Your Branch — e.g. Computer Science] · CGPA: [X.X/10] Aug 2024 – Aug 2028

Kendriya Vidyalaya Gorakhpur, India

Intermediate Education (Class XII); Percentage: [confirm — currently listed 88.8%] 2022

Kendriya Vidyalaya Gorakhpur, India

Secondary Education (Class X); Percentage: [confirm — currently listed 88.8%] 2020

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript

GenAI / ML: LangChain, LangGraph, RAG, ChromaDB, Google Gemini API, LangSmith, Prompt Engineering

Web / Tools: React.js, FastAPI, Streamlit, NumPy, Pandas, Git

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Generative AI

Soft Skills: Leadership, Teamwork, Time Management, Problem Solving

WORK EXPERIENCE

GenAI Engineering Intern — AI Margdarshak Jan 2026 – Present

Stack: LangChain, LangGraph, LLMs (Gemini)

- Reduced LLM token consumption by 33% (1/3) by [briefly describe technique — e.g. trimming context window / caching / prompt restructuring], cutting API costs.
- Built the core itinerary-generation pipeline using LangGraph state orchestration, handling 10,000+ queries for 500 users.
- Fixed 5 frontend bugs and shipped 8+ components in React.js, improving [specific outcome — load time, UX flow, etc.].

PROJECTS

Hospital helping chatbot

Python, FastAPI, LangGraph, GenAI, chromadb, langsmith

- Built a RAG-based AI hospital assistant that manages medication reminders, appointment schedules, answers hospital FAQs, and escalates complex queries to doctors through a LangGraph-based workflow.
- Developed FastAPI REST APIs, integrated ChromaDB for semantic document retrieval, implemented persistent conversation memory, and used LangSmith for workflow tracing and debugging
- GitHub: [https://github.com/Theionizers/Hospital_discharge_assistant] (currently working on it)

AI Clothing Recommendation Chatbot

Python, FastAPI, LangGraph, ChromaDB, Google Gemini, LangSmith, Streamlit

- Built an end-to-end GenAI shopping assistant with a LangGraph StateGraph pipeline (router → search/chat/follow-up nodes) and MemorySaver checkpointing for multi-turn conversations.
- Generated Gemini embeddings for a product catalog and indexed them in ChromaDB, enabling semantic search that returns relevant clothing matches from natural-language queries.
- Instrumented the pipeline with LangSmith tracing to debug routing and latency issues, and deployed a Streamlit frontend for end-to-end interaction.
- Working demo: youtu.be/exygDoNN4x4 | GitHub: github.com/theionizers/dress-recommender-chatbot

ACHIEVEMENTS

- Solved 400+ problems on LeetCode
- Codechef max rating: 1472
- Smart India Hackathon (SIH) finalist — college level
- 1st place, Tussle — Innovation & Incubation Center, KNIT Sultanpur
